

CLAIMS

1. A cooling device (1) comprising an inner chamber (4) provided with at least one placement device (6, 7, 9) for items to be placed such as food, wherein the placement device (6, 7, 9) comprises a shelf area (14, 14', 14"), characterised in that the shelf area (14, 14', 14") is made of a ceramic material.
2. The cooling device (1) according to claim 1, characterised in that the placement device (6, 7, 9) is fabricated in one piece from a ceramic material.
3. The cooling device (1) according to claim 1 or claim 2, characterised in that the placement device (6, 7, 9) is constructed as a support plate (6), a door compartment (9) or as a pull-out box (7).
4. The cooling device (1) according to any one of the preceding claims, characterised in that the shelf area contains pigments.
5. The cooling device (1) according to any one of the preceding claims, characterised in that the ceramic material is provided with a glaze.
6. The cooling device (1) according to claim 5, characterised in that pigments are added to the glaze.
7. The cooling device (1) according to any one of the preceding claims, characterised in that at least two of the placement devices (6, 7, 9) are differently coloured.
